

THE
"ADVANCE"
SCROLL SAW,
WITH DRILL ATTACHMENT.

Manufactured by
O. M. GREENE,
North Chelmsford, Mass.

"The Advance"

*Just the thing for a Present to yourself
or Friends.*

THESE SAWS are unlike the many rough and imperfect machines that flood the market.

They are made in the best manner, are strong, durable and convenient, and are designed to meet the demand for a first class machine, adapted for first class work, at a reasonable price.

They have large capacity, admitting of a swing of 20 inches, an improvement so obvious as to need no further mention. The frame, which is strong and well braced, has a table 24 inches by 20 in., and the saw table is 12 inches in diameter, made in sections to prevent warping. These tables are of maple, finely finished, and possess great advantages over tables of darker wood, especially for evening work.

The saw springs are made with the greatest care and are adjustable for running from 000 saws up to the largest.

"The Advance."

*The Best is the cheapest
in the long run.*

Two lengths of stroke for the saw can be had, the change from one to the other being quickly made.

The friction wheels have wide faces and the action of the machine is regular and easy.

The Drill Attachment has a new and improved Chuck which can be removed from the spindle without displacing the drill.

The Driving Wheel has lever adjustment, by which the change from saw to drill, or vice versa, can be instantly effected.

If you want a servicable saw, one that runs as steadily as a steam engine, which has late and valuable improvements, a machine fitted and finished in the best manner, call for

The "ADVANCE."

(over)

“THE ADVANCE,”

*Artistic in Design, Unequaled in Excellence,
adapted for heavy and light work.*
