PAUL LUKAS, STAGE AND SCREEN STAR,
VISITS OFFICE OF SCIENTIST HE PORTRAYED

Michael Pupin, outstanding American inventor and former Columbia University professor, was the subject of a radio dramatization on a recent "Cavalcade of America" broadcast titled "This Way To Tomorrow."

In an effort to capture Pupin's character, Lukas visited the Columbia University offices and laboratory of the great inventor, which have been preserved almost unchanged since Pupin's death in 1935. Dean George B. Pegram, (left), head of Columbia's Graduate Faculties and one of America's leading physicists, who was a colleague of Pupin, elaborates on passages in Pupin's book for the benefit of Mr. Lukas. In background is a portrait of Professor Pupin.
