Dear Herb:

On October 21st I attended the Symposium of the IRE Professional Group on Engineering Writing and Speech and I heard a lecture by Cyril Hoyler which ended up with one or two slides in which you appeared followed by a record of your performance as a musician on the synthetic music machine. I was impressed with the musical performance and the demonstrated versatility of the machine. I was also glad to have a sort of indirect bit of contact with you and I wish you could have been there in person.

Sincerely yours
